Medical Student Responsibilities

1. Be there in a timely manner to the clinic assigned.

2. Your duty as a rotating medical student will be to participate as an active member of the Dermatology Department. You will evaluate the patient, present to the attending physician and be required to type a clinic note regarding the visit for each patient you encounter. This will be signed by the attending presiding over the clinic.

3. Inform the Medical Student Coordinator at the University of any absences you may require while on the rotation (vacation, continuity clinics, etc.) Please inform her/him at the earliest opportunity as they are required to submit clinic assignments and we rely heavily on your participation in the clinics.

4. Attend pertinent lectures provided on the lecture schedule and attend Grand Rounds.

5. You DO NOT have to participate in any Path sessions on the schedule. Typically, an adjunct faculty member will provide additional instruction during this time or a senior resident will cover a topic for you.

6. Treat all nurses and administrative staff with respect.

7. At the end of the rotation, please complete the course evaluation electronically in the E*value system. We’re extremely interested in your experience and ways to improve your rotation.

8. Have a great time! If there are any questions, please ask!
